Let **SMART** Enhance the Security
and Productivity of your Business

THE **SMART** APPROACH THAT MAKES US DIFFERENT

Our unique approach in reviewing a far broader spectrum of service lines compared with single discipline providers, ensures that the customer sees a true return on investment and efficiency benefits. With a consultative approach, **SMART** gains an understanding of our customer issues and opportunities, which allows us to bring together more information, greater accuracy of events and a combined solution through a centralised software platform.

Our range of consultancy services in addition to above, give our customers the added value and support of expertise that comes from years of experience in both the Security and Facilities industries.

These services include:

- ▶ **Corporate & Business Security Risk** advice and support. Evaluation of security risk to your business, using our intelligent tools
- ▶ **Health & Safety** business support including policies, audit and evaluation
- ▶ **Facilities Management** process enhancement support utilising our technology to ensure the most efficient operational approach is undertaken
- ▶ **Energy Saving Lighting Services** and surveys which provide substantial savings on utility costs

INTEGRATED SOLUTIONS APPROACH

Our **SMART** solutions enable immediate recognition
and recollection of events and data

Improved security, health and safety and productivity through an integrated approach
delivering a true return on your investment.

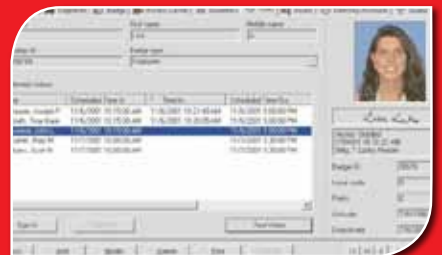

Peace of Mind Through Integrated Design

ACCESS CONTROL AND KEY MANAGEMENT SYSTEMS

Services

- ▶ Manage secure access 24 hours a day

Much more than just a security alarm system

AFFORDABLE SOLUTIONS

HOW YOU BENEFIT FROM LEASING

You can update your equipment anytime

With a rental facility you can benefit from the latest equipment today. Plus, at any time you can update or add-on equipment without penalty. Changes can be made through a simple contract revision, often without any increase in the rental.

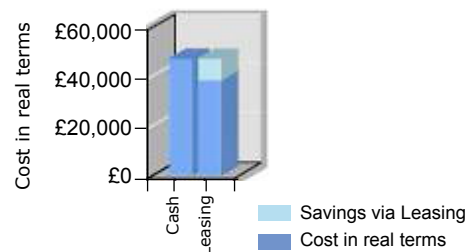

You can keep your cash in your business

Rental means that your capital is conserved. With a rental facility you can benefit from the latest equipment under the security of rental payments known also as constant cost. You can use your capital for the core areas of your business and attain higher returns.

You can enjoy Tax Relief on your total rentals

We can through our partner provide a lease rental option that helps spread the cost of your new solution over its useful working lifetime. This allows you to relate day to day benefits with the day to day costs whilst potentially making notable savings over the term of the agreement (please see Graph and Table to the right) as the total rentals repayable are 100% tax allowable.

	Cash	Leasing
Capital Cost	£55,000.00	£55,000.00
Cost with interest paid	£55,000.00	£68,178.00
Cost minus tax savings	£41,250.10	£51,133.50
Cost minus ROCE*	£47,239.01	£38,482.69
Overall Net Cost	£47,239.01	£38,482.69
Leasing cheaper by:		£8,756.32

NB: All figures are based on an assumed corporation tax rate of 25%, 1st yrs allowance of 25% and a 15% *Return on Capital Employed (ROCE). Disclaimer: This calculation is purely for illustration of the potential tax benefits when comparing a Finance Lease contract against an outright cash purchase. Assumptions are made with regards to the rate of corporation tax paid by a company or the rate of tax paid by a Sole trader or Partnership. For a more accurate assessment of your situation please contact an accountant or financial adviser. SIS and Clear Asset Finance do not accept liability for any incorrect assessment as this is purely a demonstration.

MONITORING OF YOUR PREMISES

SMART can offer the very latest monitoring and response services to ensure your property is protected and that the relevant response is gained.

This can include CCTV, intruder alarms, site access and notification of events through either our **SMART Apps** or communication services.

Peace of Mind Through Integrated Design
